

# GABA ELISA kit

## Any sample

Ref: BA-E-2500

This GABA ELISA kit enables the measurement of Gamma-aminobutyric acid in any biological sample. Intended for *in vitro* diagnostics, this quantitative assay can be performed in cell cultures, tissue homogenates, urine, plasma, serum, etc.

<b>Sample type</b>	100 - 300µl, all biological samples
<b>Samples/kit</b>	40 samples in duplicate
<b>Sensitivity</b>	Depending on sample matrix and volume
<b>Range</b>	25 - 2 500ng/ml, 75 - 7 500ng/ml
<b>Assay time</b>	Extraction & derivatization (2h30), ELISA overnight
<b>Reactivity</b>	Reacts with all species
<b>References</b>	<a href="#">Cited in 13 papers</a>

# INFORMATIONS

## Product overview

<b>Product name</b>	GABA ELISA kit
<b>Description</b>	Research / In Vitro Diagnostics (CE) Enzyme immunoassay (ELISA) for the quantitative determination of $\gamma$ -Aminobutyric acid in biological samples
<b>Format</b>	96-well plate
<b>Samples</b>	Any sample
<b>Sample volume</b>	100 – 300 $\mu$ l
<b>Reactivity</b>	Reacts with all species
<b>Standard range</b>	Serum, plasma 0 / 25 – 2 500ng/ml
<b>Sensitivity</b>	Depending on sample matrix and volume
<b>Specificity</b>	No significant cross-reactivity was observed with GABA analogs such as Beta-Alanine and alpha-aminobutyric acid
<b>Assay time</b>	2h30 sample extraction and derivatization, ELISA overnight
<b>Storage</b>	Store at 2-8°C for to 6 months
<b>Datasheets</b>	<a href="#">Instructions for use</a> , <a href="#">Material safety datasheet</a>
