

IS1006

## GABA Antibody - Rabbit Polyclonal

The anti-GABA antibody IS1006 has been validated by our team for immunofluorescence in primary mouse and rat neurons using the [STAINperfect immunostaining kit A](#). Additionally, recent scientific studies have employed this antibody to highlight GABAergic systems in human stem cell-derived neurons and rabbit olfactory bulb tissues. When combined with the STAINperfect immunostaining kit A, this rabbit polyclonal antibody enables the clear visualization of gamma-aminobutyric acid (GABA) in cell cultures, tissue sections, and whole mounts from any species.

[Cited in 2 papers](#)

<b>Clonality</b>	Polyclonal antibody
<b>Host</b>	Rabbit
<b>Reactivity</b>	Reacts with all species
<b>Tested samples</b>	Rodent primary neurons, Rabbit Brain Tissues, Human iPSC-derived neurons
<b>Staining procedure</b>	STAINperfect immunostaining kit A (protocols for cell cultures, whole mounts, tissue sections)
<b>Format</b>	50µL (approx. 40 tissue sections)
<b>Storage</b>	Store at +4°C for short term (1-2 months). Aliquot and store at -20°C for long term. Avoid repeated freeze / thaw cycles
<b>Immunofluorescence (IF)</b>	Dilute antibody with the antibody diluent provided in the <a href="#">STAINperfect immunostaining kit A</a> . Use at 1/250 -1/1000 dilution. Follow the STAINperfect protocol suited to your sample (Cell cultures, Whole mounts, Tissue sections)
<b>Comments</b>	Optimal working dilutions must be determined by the end-user
<b>Restrictions</b>	For research use only
