

BA-E-1100R

Histamine release in whole blood - ELISA kit Add-on (XL)

Intended for research use, this add-on to the [BA-E-1000R histamine ELISA kit](#) enables the measurement of histamine release in heparinized whole blood samples, allowing for instance to determine the sensitivity of basophilic granulocytes to specific allergens. Important: this product is only sold in 10-unit format.

Sample type	Heparinized whole blood
Capacity	10 x 96 determinations
Range	0/0.5 – 50 ng/mL
Assay time	Sample preparation 90 min
Reactivity	Reacts with all species
Application	Research use only
Storage	Store at 2-8°C for up to 6 months
Sample collection & storage	See instructions for use
