

IS1011

## Kynurenic acid Antibody - Rabbit Polyclonal

The anti-kynurenic acid (KYNA) rabbit polyclonal antibody IS1011 was successfully validated for immunohistochemistry (IHC) on human paraffin-embedded brain tissues. Optimal staining was achieved at a 1:2000 dilution, with a single vial sufficient for approximately 400 stainings.

<b>Clonality</b>	Polyclonal antibody
<b>Host</b>	Rabbit
<b>Reactivity</b>	Reacts with all species
<b>Tested samples</b>	Human FFPE brain and lung tissues
<b>Staining procedure</b>	Perform heat antigen retrieval (pH=6) before standard IHC/IF staining
<b>Format</b>	50µL
<b>Storage</b>	Store at +4°C for short term (1-2 months). Aliquot and store at -20°C for long term. Avoid repeated freeze / thaw cycles
<b>Immunohistochemistry (IHC)</b>	Dilute at 1:200-1:2000. Perform heat antigen retrieval (pH=6) before initiating IHC staining protocol on paraffin-embedded and frozen sections
<b>Comments</b>	Optimal working dilutions must be determined by the end-user
<b>Restrictions</b>	For research use only
