

IS1003

L-Serine Antibody - Rabbit Polyclonal

The anti-L-Serine antibody IS1003 is the first and only antibody available specifically for L-Serine detection. When paired with the [STAINperfect immunostaining kit A](#), this rabbit polyclonal antibody enables clear visualization of L-Serine in cell cultures, tissue sections, and whole mounts. Our team successfully employed IS1003 to detect L-Serine in mouse primary neurons and brainstem tissues.

[Cited in 1 paper](#)

Clonality	Polyclonal antibody
Host	Rabbit
Reactivity	Reacts with all species
Tested samples	Rodent primary neurons and brain tissues
Staining procedure	STAINperfect immunostaining kit A (protocols for cell cultures, whole mounts, tissue sections)
Format	50µL (approx. 40 tissue sections)
Storage	Store at +4°C for short term (1-2 months). Aliquot and store at -20°C for long term. Avoid repeated freeze / thaw cycles
Immunofluorescence (IF)	Dilute antibody with the antibody diluent provided in the STAINperfect immunostaining kit A . Use at 1/250 -1/1000 dilution. Follow the STAINperfect protocol suited to your sample (Cell cultures, Whole mounts, Tissue sections)
Comments	Optimal working dilutions must be determined by the end-user
Restrictions	For research use only
