

IS1069

L-Tryptophan antibody - Rabbit Polyclonal

The anti-L-Tryptophan antibody IS1069 enables the detection of L-Tryptophan in biological samples. This rabbit polyclonal antibody can be combined with our range of [mouse monoclonal antibodies to tryptophan downstream metabolites](#) for multiplexed imaging. Requiring the use of the [STAINperfect immunostaining kit A](#), the antibody is supplied with ready-to-use protocols for IF, ICC, and IHC applications.

Clonality	Polyclonal antibody
Host	Rabbit
Reactivity	Reacts with all species
Eligible samples	Cell cultures, whole mounts, tissue sections
Staining procedure	STAINperfect immunostaining kit A
Format	50µL (approx. 40 tissue sections)
Storage	Store at +4°C for short term (1-2 months). Aliquot and store at -20°C for long term. Avoid repeated freeze / thaw cycles
Immunofluorescence (IF)	Dilute antibody with the antibody diluent provided in the STAINperfect immunostaining kit A . Use at 1/250 -1/1000 dilution. Follow the STAINperfect protocol suited to your sample (Cell cultures, Whole mounts, Tissue sections)
Comments	Optimal working dilutions must be determined by the end-user
Restrictions	For research use only
