

IS1028

Normetanephine Antibody - Rabbit Polyclonal

The rabbit polyclonal anti-normetanephine antibody IS1028 was validated for immunohistofluorescence (IF) in crayfish tissues and mouse brain whole mounts using the [STAINperfect immunostaining kit A](#). In combination with this kit, IS1028 can also enable effective visualization of normetanephine in cell cultures and tissue sections.

Clonality	Polyclonal antibody
Host	Rabbit
Reactivity	Reacts with all species
Tested samples	Mouse brain tissues, crayfish tissues
Staining procedure	STAINperfect immunostaining kit A (protocols for cell cultures, whole mounts, tissue sections)
Format	50µL (approx. 40 tissue sections)
Storage	Store at +4°C for short term (1-2 months). Aliquot and store at -20°C for long term. Avoid repeated freeze / thaw cycles
Immunofluorescence (IF)	Dilute antibody with the antibody diluent provided in the STAINperfect immunostaining kit A . Use at 1/250 -1/1000 dilution. Follow the STAINperfect protocol suited to your sample (Cell cultures, Whole mounts, Tissue sections)
Comments	Optimal working dilutions must be determined by the end-user
Restrictions	For research use only
