## Plasma Metanephrite ELISA kit

This Plasma Metanephrite ELISA kit enables the measurement of free L-metanephrite in plasma samples with high sensitivity. Intended for *in vitro* diagnostics (EU only) & research use, this quantitative immunoassay is based on a simple and fast sample preparation protocol, and offers a limit of detection below 15pg/ml.

[Cited in 1 paper](#)

<b>Sample type</b>	200µl plasma
<b>Capacity</b>	1x 96-well plate
<b>Sensitivity</b>	Metanephrite: 14.9 pg/ml
<b>Range</b>	Metanephrite: 0/36 - 3,600 pg/ml
<b>Assay time</b>	Sample preparation and acetylation (2h35 min), ELISA overnight
<b>Reactivity</b>	Reacts with all species
<b>Application</b>	<b>Research use or IVD (EU only)</b>
<b>Storage</b>	Store at 2-8°C for to 6 months
<b>Sample collection &amp; storage</b>	EDTA- or Heparin-plasma sample only. Do not use haemolytic or lipemic samples. Storage: up to 6 hours at 2 - 8°C; for longer periods (up to 6 months) at - 20°C
<b>Sample preparation</b>	Extraction and acylation 2 hours 35 min
<b>ELISA</b>	Metanephrite antisera incubation overnight, revelation & read steps (1h)
