Quinolinic acid Antibody - Rabbit Polyclonal

Validated for immunohistochemical analysis in paraffin-embedded human parkinsonian brain specimens, this anti-Quinolinic acid (QUIN) rabbit polyclonal antibody was recently employed in scientific publications to confirm the presence of Quinolinic acid in FFPE brain and lung tissues using both immunohistochemistry (IHC) and immunohistofluorescence (IHF).

[Cited in 4 papers](#)

Clonality	Polyclonal antibody
Host	Rabbit
Reactivity	Reacts with all species
Tested samples	Human FFPE brain and lung tissues
Staining procedure	Perform heat antigen retrieval (pH=9) before standard IHF/IF staining
Format	50µL
Storage	Store at +4°C for short term (1-2 months). Aliquot and store at -20°C for long term. Avoid repeated freeze / thaw cycles
Immunohistochemistry (IHC)	Dilute at 1:200-1:2000. Perform heat antigen retrieval (pH=9) before initiating IHC staining protocol on paraffin-embedded and frozen sections
Comments	Optimal working dilutions must be determined by the end-user
Restrictions	For research use only
