

IS1086

Serotonin Antibody for FFPE samples - Rabbit Polyclonal

Our Serotonin antibody for FFPE samples (#IS1086, rabbit polyclonal) is specifically designed for reliable detection of serotonin (5-hydroxytryptamine, 5-HT) in formalin-fixed paraffin-embedded tissues. This antibody enables accurate visualization of the serotonergic system and has been thoroughly validated for both immunohistochemistry (IHC) and immunofluorescence (IF) applications in mouse and human specimens.

Clonality	Polyclonal antibody
Host	Rabbit
Reactivity	Reacts with all species
Tested samples	Human tumor samples, Mouse brain tissues
Staining procedure	IHC / IHF
Format	50µL (approx. 40 tissue sections)
Storage	Store at +4°C for short term (1-2 months). Aliquot and store at -20°C for long term. Avoid repeated freeze / thaw cycles
IHC/IF	Dilute at 1/250 -1/1000
Comments	Optimal working dilutions must be determined by the end-user
Restrictions	For research use only
